

Home Trash Audit

Conduct an audit of your various bins (place one checklist for each bin) & note down what you're discarding in each at the end of the day when you're taking out the trash. Do this for 7 days. As you track your waste, you will start becoming aware of what goes into each waste category. Each home is unique & produces different waste. Aim to be imperfectly perfect & sustainable for you as even a small positive change is good for the planet.

Recycling

Compost

General Trash
